Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted full registration to technical grade novaluron and the end-use product Rimon 10 EC for use in Canada on apples and potatoes. The specific uses approved in Canada are detailed on the product label of Rimon 10 EC (*Pest Control Products Act* Registration Number 28515).

Corresponding maximum residue limits (MRLs) were identified in Proposed Maximum Residue Limit document PMRL2007-04, *Novaluron*, published on 27 April 2007. The PMRL referenced the consultation document published on 22 December 2006, Proposed Registration Decision PRD2006-05, *Novaluron*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs are legally in effect as of the publication date of this document.

Established Maximum Residue Limits for Novaluron

Common Chemical Name	Chemical Name of Substance	MRL (ppm)	Food Commodity
Novaluron	*N*-[[[3-chloro-4-[1,1,2-trifluoro-2-(trifluoromethoxy)ethoxy] phenyl]amino]carbonyl]-2,6-difluorobenzamide	2.0	Pome fruits (Crop Group 11)
		0.05	Tuberous and corm vegetables (Crop Subgroup 1C)
		8.0	Milk, fat
		7.0	Fat of cattle, goats, horses and sheep
		0.5	Milk
		0.4	Meat and meat byproducts* of cattle, goats, horses and sheep
		0.01	Fat, meat and meat byproducts* of hogs

* Note that the livestock commodity MRLs established herein are consistent with those proposed in PMRL2007-04. The specific references to kidney and liver have been removed given that meat byproducts include both kidney and liver unless a distinct MRL is required for one or both of these commodities. This is not necessary for novaluron and therefore both kidney and liver are included in the MRLs established for meat byproducts.

MRLs for the listed crop groups are established for each commodity in the group or subgroup in accordance with Appendix I.

A complete list of all MRLs established in Canada can be found on the PMRA's MRL webpage.

Appendix I

Crop Groups: **Numbers and Definitions**

Crop Group Number	Name of the Crop Group	Food Commodities Included in the Crop Group
1C	Root and tuber vegetables Tuberous and corm vegetables subgroup	Arracacha Arrowroot Cassava roots Chayote roots Chinese artichokes Chufa Edible canna Ginger roots Jerusalem artichokes Lerens Potatoes Sweet potato roots Tanier corms Taro corms True yam tubers Turmeric roots Yam bean roots
11	Pome fruits	Apples Crabapples Loquats Mayhaws Pears Oriental pears Quinces
